

PhD IN PROTIST FUNCTIONAL GENOMICS

will be available at the Institute of Parasitology, Biology Centre and University of South Bohemia, České Budějovice, starting in February 2015.

The project is part of a long-term research on trypanosomes and related flagellates in our laboratory (for more information see: <http://www.paru.cas.cz/en/section/molecular-parasitology/laboratory-of-molecular-biology-of-protists/>).

The successful candidate is expected to have a diploma/MSc degree in molecular and/or cell biology and high motivation. Please send cover letter and CV to Julius Lukeš (jula@paru.cas.cz).
